**Air Con Re-gas**

**FREE** with every major service

**£25** with every interim or full service

**Service**

**FROM £99.99** plus VAT

## We're your approved ECU REMAPPING Specialist

Vehicle ECU (Engine Computer System) Remapping is a process that involves upgrading the files and parameters stored in your vehicle's onboard computer that were loaded and installed from new at the factory. Using advanced diagnostic equipment we update the engine's software to enhance performance and reliability. By connecting to your vehicle's diagnostics port, we make copies of the original files and our technicians upgrade the software before uploading the new files back to the vehicle's ECU. We don't remove any components and always retain the original files should you at any time wish to revert to factory settings.

### Economy Car ECU Remapping

Want to save money on fuel? Then our economy tune remap is for you. Available for most UK cars. To improve your fuel economy; we tweak the pressure and timing files and adjust fuel pulse and turbo boost.

### Petrol Performance Car ECU Remapping

Most increases are seen on turbo petrol engines. This gives the engine far more gear ratio flexibility, delivering a notably superior and smoother drive, noticeably more responsive with power to the throttle.

### Diesel Performance Car ECU Remapping

By remapping your diesel engine we can achieve approximate gains of 20-40% increase in additional BHP and up to 60% extra torque.

### Speed Limit Removal

Many manufacturers have a speed limit function which contrary to popular belief, we can remove. Simply by connecting to your vehicle's diagnostics port.

### Van & Fleet ECU Remapping

With an economy remap to your fleet you could save up to 20% on fuel bills, increase the MPG and improve engine efficiency.

SAVE UP TO **20% OFF** your fuel bills!

FROM ONLY **£199** plus VAT
